CASANOVA
EXCLUSIVE COLLECTION

ITALIAN STYLE NATURAL SOLUTION

TRADIZIONE E INNOVAZIONE

La raffinatezza e la ricchezza delle maschere veneziane hanno ispirato la collezione Casanova:

come le maschere anche i nostri prodotti sono creazioni artigianali in cui maestosità e gusto si intrecciano in un connubio di lusso e armonia.

Un viaggio nel cuore della cultura e della tradizione italiana, dove emozione e magia si uniscono all'eleganza e allo sfarzo dei dettagli.

I riflessi di luce che scaturiscono dalle maschere e dalle nostre creazioni, colpiscono i sensi e richiamano un'epoca passata.

I prodotti Casanova si sposano perfettamente a contesti di stile classico ma anche moderno.

La tecnica utilizzata per realizzare la collezione Casanova è l'acquaforte, tecnica calcografica molto antica che consiste nel mordere una lastra di marmo con un acido (detto nel Medioevo acquafortis, da cui è tratto il nome) per ricavarne i disegni che caratterizzano queste superfici.

La tecnica incisoria, molto usata in età preistorica sulla pietra e in età classica, nella ceramica greca, nella decorazione dei metalli, trovò largo impiego, attraverso il tempo e fino ai giorni nostri, nella decorazione di oggetti d'arte e nell'architettura applicata ai materiali più disparati.

Per un buon utilizzo dei prodotti, vi invitiamo a leggere attentamente le informazioni tecniche in fondo al catalogo.

TRADITION AND INNOVATION

The sophisticated richness of Venetian masks is the inspiration for the Casanova collection:

like these masks, our products are also hand-crafted creations in which mastery and taste mix together in a blend of luxury and harmony.

A journey to the heart of Italian culture and tradition, where emotions and magic blend with the elegance and luxury of the details.

The light that reflects off the masks and off our creations amazes the senses, recalling past eras.

Casanova products blend perfectly into both classic and modern settings.

The technique used to create the Casanova collection is that of etching, a very ancient calcographic technique used to etch marble slabs with acid (also known in the Middle Ages as *acqua fortis*, from where it gets its Italian name) to create the patterns typical of these surfaces.

The etching technique, used commonly in prehistoric eras on stone and in classic times on Greek ceramics and metal decoration, has been used widely over the centuries and into modern times as an artistic decoration, and in architecture on a wide range of materials.

In order to use our products correctly, please read the technical information at the bottom of the catalogue carefully.

ТРАДИЦИИ И ИННОВАЦИИ

На создание коллекции Casanova нас вдохновили изысканность и богатство оформления венецианских масок:

наша продукция тоже представляет собой произведения ремесленного искусства, в которых величественность и вкус искусно переплетаются с роскошью и гармонией.

С нашей продукцией вы сможете представить себя в сердце итальянской культуры и традиций, где сочетание эмоций и волшебства воплощается в элегантности и роскоши деталей.

Отблески света, отражающиеся на поверхности наших изделий, как и на венецианских масках, восхищают своей безукоризненностью и переносят в прошлое.

В продукции Casanova гармонично сочетаются классика и современный стиль.

Для создания коллекции Casanova применялась древняя гравировальная техника офорта, которая заключается в протравливании мраморной плиты кислотой (в средние века она называлась *acqua fortis*, откуда произошло название техники) для создания рисунков на ее поверхности.

Техника резьбы по камню, которая использовалась для создания рисунков на камне в доисторические времена, а в эпоху классицизма — для изготовления греческой керамики и украшения изделий из металла, находила широкое применение в древности, актуальна она и в наши дни. Эта техника применяется для оформления произведений искусства, а также в архитектуре для работы с различными материалами.

Внимательно прочитайте техническую информацию о продукции. Соблюдая необходимые требования, вы сможете использовать ее длительный срок.

A close-up photograph of a white Venetian mask with red lips and a red floral headpiece. The mask is positioned on the right side of the frame, with its eyes obscured by dark cutouts. The headpiece is made of red fabric with gold and silver sequins and small white flowers. The background is a soft-focus field of red flowers, creating a bokeh effect. A white horizontal bar is overlaid on the left side of the image, containing the text 'CALLE MOLIN' in a bold, sans-serif font.

PG10

A photograph of two individuals in elaborate Venetian carnival costumes. They are wearing white, featureless masks with dark eye cutouts and gold lips. Their outfits consist of black high-collared hennin-style hats adorned with large, iridescent blue and green feathers. The jackets are made of a dark fabric with intricate floral embroidery in red, gold, and white, and are lined with black fur. The background is a blurred outdoor setting, likely a street in Venice.

INFORMAZIONI TECNICHE

Questa sezione nasce dall'esigenza di fornire al cliente le informazioni necessarie per un buon utilizzo dei prodotti Casanova.

CARATTERISTICHE GENERALI DEL PRODOTTO

Essendo un materiale assolutamente naturale, il marmo può presentare variazioni di tono, magrosità, bordi irregolari e angoli imperfetti: queste caratteristiche, che possono modificare l'effetto finale dell'acidatura, sono un elemento di pregio, indice di una produzione artigianale e non possono costituire motivo di contestazione.

La tonalizzazione fra più formati dello stesso tipo di marmo non può essere garantita nemmeno se richiesti nello stesso ordine.

La finitura dei prodotti Casanova è levigata.

IMPORTANTE

Qualsiasi campione fornito da Foredil dovrà intendersi puramente indicativo: si possono presentare differenze di tono anche molto marcate tra campioni e materiale consegnato.

Si prega di controllare la merce subito dopo l'arrivo, eventuali vizi o difetti devono essere comunicati entro 8 giorni dall'arrivo della merce.

Non si accettano reclami e richieste di risarcimento per materiale già posato.

CONSIGLI PER POSA, TRATTAMENTO E PULIZIA

Consigliamo l'utilizzo di questi prodotti a rivestimento di pareti interne.

Evitare il contatto con l'acqua e quindi la posa in piscine, docce e ambienti che rimangono permanentemente bagnati.

Si consiglia di utilizzare esclusivamente stucchi a base d'acqua.

Una volta posato si suggerisce il trattamento del materiale con un idrorepellente neutro, per aumentare l'impermeabilità alle macchie.

Appena terminata la posa consigliamo di pulire accuratamente il prodotto con acqua e sapone, utilizzando delle spugne morbide.

La pulizia deve essere fatta solo con acqua o detersivi a base d'acqua.

Non utilizzare solventi, prodotti a base acida: evitare assolutamente l'uso di macchinari abrasivi o lucidanti e apparecchi ad emissione di vapore.

Vi suggeriamo di prestare particolare cura nel taglio dei prodotti Casanova, per evitare di rovinare la decorazione.

Il nostro ufficio tecnico è a Vostra disposizione per qualsiasi tipo di domanda o chiarimento e per eventuali richieste su progetto.

TECHNICAL INFORMATION

This section is designed to provide customers with all the information they need to ensure the correct use of Casanova products.

GENERAL PRODUCT FEATURES

As it is a totally natural material, marble can be varied in colour shade and grain, and may have irregular edges and imperfect corners: these characteristics, which may modify the final effect of the acid etching, must be considered as positive features, a demonstration of the hand-crafted production, and shall not constitute cause for complaint.

Matching colour shades in different sizes of the same kind of marble cannot be guaranteed even when requested in the same order.

Casanova products are supplied with a honed finish.

IMPORTANT

Any samples provided by Foredil are considered to be purely indicative: there may be even marked differences between the colour shade of the samples and the delivered material.

Please check the goods immediately on delivery; any defects must be notified within 8 days of receipt of the goods.

Complaints and claims will not be accepted for laid material.

LAYING, TREATMENT AND CLEANING ADVICE

We recommend the use of these products for internal wall tiling.

Avoid contact with water; do not lay in swimming pools, showers or any places which remain permanently wet.

Use only water-based grouts.

After laying, treat the material with a neutral water-repellent, to increase the resistance to stains.

Immediately after laying, clean the tiles carefully with soap and water, using a soft sponge.

Clean the tiles only with water and water-based detergents.

Do not use solvents or acid-based products: avoid the use of abrasive or polishing machines, or other steam cleaners.

Take particular care when cutting Casanova products, to avoid damaging the decoration.

Our technical department is at your disposal for any questions, clarifications and any other specific requirements.

ТЕХНИЧЕСКАЯ ИНФОРМАЦИЯ

В этом разделе приводится информация, необходимая для правильного использования продукции Casanova и сохранения ее качества.

ОБЩИЕ ХАРАКТЕРИСТИКИ ПРОДУКЦИИ

Мрамор как природный материал бывает разных цветовых оттенков, у него бывает неоднородная толщина, разнообразные края и углы. Именно эти характеристики, которые влияют на конечный результат протравливания, и придают продукции ценность произведения ремесленного искусства.

При заказе следует учитывать, что мы не можем гарантировать точное соответствие оттенка мрамора заказанному.

Продукция Casanova поставляется в полированном виде.

ВАЖНО!

Образцы предоставляются компанией Foredil в целях ознакомления. Конечная продукция может отличаться от образца.

Проверьте изделия сразу же после поставки в отношении возможных дефектов. Если выявлены такие дефекты, сообщите об этом в течение 8 дней после получения товара.

Рекламации и запросы на обмен в отношении установленной продукции не принимаются.

СОВЕТЫ ПО УСТАНОВКЕ, УХОДУ И ЧИСТКЕ ИЗДЕЛИЙ

Советуем устанавливать наши изделия при отделке внутренних стен.

Избегайте контакта изделий с водой, не устанавливайте их в бассейнах, душах и местах с постоянной повышенной влажностью.

Рекомендуется использовать исключительно штукатурку на водной основе.

Во избежание появления пятен для ухода за изделиями пользуйтесь нейтральным водоотталкивающим материалом.

После установки тщательно очистите изделие с помощью мыла и воды, используя для этого мягкие губки.

Чистите изделия только с помощью воды и чистящих средств на основе воды.

Не применяйте растворители и вещества на кислотной основе. Категорически запрещается использование абразивных, полирующих инструментов или парогенераторов.

Во избежание разрушения украшений на продукции Casanova особое внимание уделяйте уходу за срезами изделий.

Если у вас возникнут любые вопросы или вам понадобятся какие-либо разъяснения, а также если вы хотите подать запросы в отношении проектов, обращайтесь в наш технический отдел.
