

Mosaici Patinati Mix

 **FOREDIL**

italian style, natural solution

Mosaici Patinati Mix è il nuovo catalogo di miscele con marmi patinati presentato da Foredil. Tutti i prodotti sono forniti naturali ma su richiesta è possibile avere il materiale trattato con idrorepellenti appositi. I mix che vi presentiamo in questa collezione sono tutti personalizzabili nel colore e nel formato.

Foredil presents **Planet Mix**, the new catalogue of mixtures with glass. It is divided in 6 groups of colours, subdivided in 8 solutions of mix, available in matt finishing. All products are natural but it is possible to ask for sealing with an appropriate water-repellent. All mix of this collection can be personalized in colour and measure (square 1,5x1,5 or rectangle 1,5x3,3)

Foredil présente **Planet Mix**, le nouveau catalogue de mélanges avec verre. Il est divisé en 6 groupes de couleurs, chaque composé par 8 solutions différentes des mix, disponibles dans la finition patinée. Tous les produits sont naturels, mais il est aussi possible de demander le traitement avec un hydrofuge approprié. Les mix de cette collection peuvent tous être personnalisés dans les couleurs et les formats (carré 1,5x1,5 ou rectangulaire 1,5x3,3)

Planet Mix ist den neuen Katalog von Mischungen mit Glas der Foredil. Es ist in 6 Teile geteilt, und jeder Teil ist von 8 verschiedene Mix gebildet: die Mix sind in patinierte Oberfläche lieferbare. Alle Produkte sind natur, sondern auf Antrag können wir auch in behandelter Oberfläche liefern. Es ist auch möglich alle Mix vom Katalog in Farbe und Format (Quadrat 1,5x1,5 oder Rechteck 1,5x3,3) personalisieren.

Spessore 0,75 cm

THE ADVANTAGES OF THE THICKNESS 0.75 CM / DIE VORTEILE DER STÄRKE 0,75 CM / LES AVANTAGES DE L'ÉPAISSEUR DE 0,75 CM

Lo spessore 0,75 cm dei nostri mosaici permette la posa con angoli di curvatura molto elevati mantenendo lo spazio delle fughe più strette e di conseguenza esteticamente più eleganti, rispetto al tradizionale spessore 1 cm. Adatto per navi da crociera e strutture che richiedono poco peso, si presta alla posa in posizioni particolari, come archi, colonne e soffitti.

The 0.75 cm thickness of our mosaics allows laying with extremely high angles of curvature while still maintaining narrower spaces between tiles, thereby guaranteeing a more aesthetically elegant result compared to the traditional 1 cm thickness. Suitable for cruise ships and structures requiring reduced weights, it is suitable for laying in particular positions such as on arches, columns and ceilings.

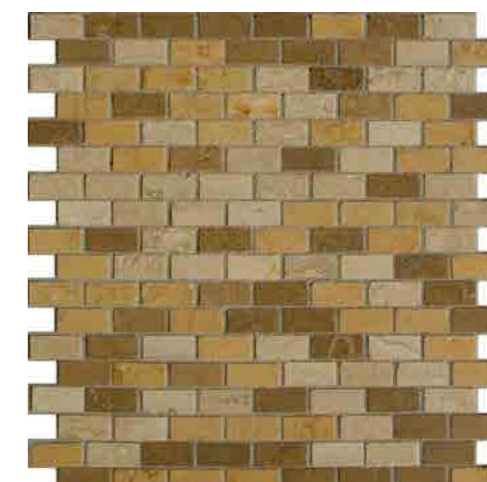

Die Stärke von 0,75 cm unserer Mosaike erlaubt die Verlegungen von wesentlich größeren Kurvenwinkeln, unter Beibehaltung engerer Fugenzwischenräumen mit der Konsequenz einer eleganteren Ästhetik, bezüglich der traditionellen Stärke von 1 cm. Geeignet für Kreuzfahrtschiffe und Strukturen, die ein geringes Gewicht erfordern. Für die Verlegung in besonderen Positionen, wie Bögen, Säulen und Decken.

L'épaisseur de 0,75 cm de nos mosaïques permet la pose avec des angles de courbe très prononcés en limitant l'espace des joints et en créant par conséquent des solutions esthétiquement plus élégantes que l'épaisseur traditionnelle de 1 cm. Particulièrement indiquée pour les bateaux de croisière et aux structures exigeant un faible poids, elles se prête à la pose dans des endroits particuliers, comme les arcs, les colonnes et les plafonds.
